RESEARCH

/ *'Drawing Ambiance'*
Alvin Boyarsky and the Architectural Association

The exhibition looks to situate the drawings, collected by Boyarsky during his tenure, as a nexus of architectural pedagogy, representing an important contribution to the field of architectural history, while re-engaging drawing as a critical medium of architectural production.

This project is in collaboration with the Museum of Art - Rhode Island School of Design, where I served as a curatorial assistant and researcher.

/ *'Drawing a pedagogy'*
The role drawing within the current architectural discourse

In attempts to relocate drawing within a present architectural pedagogy, the study 'draws' a comparison between the contemporary context of the Architectural Association, and that during the tenure of Alvin Boyarsky,

/ *'In keeping with the style of the House'*
An analytical discourse into the Midwestern, suburban 'ranch-house'

In order to intelligently and honorably accommodate the growing regeneration of the 'ranch-house', this research looks to comprehensively understand the spatial organization, tectonic construction, and contextually specific cultural themes, through a 1:1 investigation of one west Omaha residence.
